

NV Energy EV Charging Incentive

NV Energy Pays You to Install Electric Vehicle Chargers at Your Multi-Family Property.

Attracting and retaining your residents is your number one priority and as more and more consumers are purchasing electric plug-in vehicles adding EV charging stations is a serious consideration in order to compete.

Tesla alone has sold over 1 million vehicles with nearly every other auto manufacturer adding electric vehicles to their vehicle line-ups. This means that future residents will be asking about EV charging as an amenity. In addition, current residents considering an electric vehicle lease or purchase will more likely consider extending their leases, if you offer EV charging.

ChargePoint CT4021
Dual Port EV Charging
Station

"The Bottom Line" on How to Stay Ahead in Your Competitive Market.

NV Energy will provide you with a cash rebate of up to **\$6,000** per dual port charging station. This rebate covers nearly 90% of the charging station cost.*

The current funding program deadline is June 30th, so time is limited. The online application process is simple and Verdek will guide you through the entire process.

The Current Funding Program Will End June 30, 2020.

Contact us today for more details and to schedule your no obligation site review survey by one of our local electrical contractors. Email info@verdek.com or call (888) 336-3734.

* Only available to NV Energy customers, installation costs will be determined after a brief no obligation site survey.

But Wait, There's More: Federal Alternative Fuel Tax Incentive Extended Through 2020

The federal tax credit is back and it's valid for all projects completed in 2019 and it is valid through 2020. The rebates covers 30% of the cost, to a maximum of \$30,000. This makes the ROI on any EV projects instantly more attractive. This tax credit can

also be combined with the NV Energy incentive as described above.
